Subject: Re: LPT's 2301 Renaissance Boulevard Property

Mike,

I concur with the proposed shipment.

Joe

Subject: LPT's 2301 Renaissance Boulevard Property

Dear Joe:

As you are aware, we excavated some potentially impacted soil and coal-tar from two areas located south of Basin No. 1 on the subject property. These excavated areas were designated Area 2 and Area 3. As part of the excavation activities, we removed about 225 tons of potentially impacted soil that is currently stockpiled at the site on plastic. We recently received approval from R3 Technologies to dispose of this material at their Philadelphia, PA facility. The pickup of this material has been tentatively scheduled for Tuesday, August 7, 2001 pending the EPA's approval. This email is intended to request a waiver of the 14/21 day notification requirement for off-site shipments established under Section VI.E of the UAO so that this material can be removed from the site as expeditiously as possible. The following information is being provided per Section VI.E of the UAO:

1. The potentially impacted soil will be shipped to R3 technologies Philadelphia, PA facility;
2. Approximately 225 tons of soil will be shipped to the aforementioned facility;
3. The soil will be shipped out on August 7, 2001; and
4. The soil will be shipped to R3 in DOT approved trucks.

Penn E&R appreciates the EPA's assistance with this matter. Should you have any questions or require additional information, please do not hesitate to call me.

Thanks,
Mike
